

PRODUCT CHANGE NOTIFICATION

From: The Imaging Source's Product Management
Date: July 31st, 2026
Subject: Replacement for FAKRA IP67 Coaxial Cables
Product: Accessories

Reasons for Change:

To further improve product availability and reduce lead times, we have qualified an additional supplier for our FAKRA coaxial cables. The new supplier has been selected based on its ability to provide a more reliable supply while meeting our quality and performance requirements.

This change is part of our continuous supply chain optimization efforts and helps us ensure a stable and timely supply of products to our customers.

Description of Change

The affected FAKRA coaxial cables will be sourced from the new qualified supplier. The cables maintain the same form, fit, function, and specified technical characteristics as the previous version.

All products supplied by the new manufacturer have successfully passed our internal qualification process and comply with the same quality standards and applicable specifications.

Impact on Customers

No action is required by customers.

To ensure a smooth transition and avoid unnecessary waste, existing inventory of FAKRA coaxial cables from the previous supplier may continue to be shipped until stock is depleted. The change does not affect the electrical, mechanical, or functional performance of the cables. Existing part numbers, compatibility, and intended use remain unchanged unless otherwise stated in this notification.

Product: Accessories
